DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 14, 2007 has been entered.
2. Claims 1-10, 12-15, 18-20 and 22-29 are pending and presented for examination for this office action.

Allowable Subject Matter

3. Claims 1-10, 12-15, 18-20 and 22-29 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claim 1, 14 and 18-19 identify distinct features, "performing a search based on the one or more search terms with a second application at the computer, wherein the second application is of a different type than the first application, wherein the computer remaining remains in a context of the first application without initiating display of the second application to a user, returning search results to the first application, wherein returning search results generated by the second application to the first application

Art Unit: 2166

further comprises at least one of: copying at least a portion of the search results into the first application, pasting at least a portion of the search results into the first application, deleting a portion of the search results, saving at least a portion of the search results, displaying search results when a mouse arrow is moved over selected data in the first application". The closest prior art, Field et al (U.S. Patent. No. 6,338,059) disclosing executing computer implemented searching, fails to suggest the claimed limitation as mentioned above in combination with other claimed elements. The above features in conjunction with all other limitations of the dependent and independent claims 1-10, 12-15, 18-20 and 22-29 are hereby allowed.
